🧑‍💼 EXPERIENCE

Front-end Developer - *Cafe Bazaar*

SEP 2019 - PRESENT

Divar (parent co. Cafe Bazaar) is the largest horizontal classifieds in Iran with over 25 million users and more than 500 thousand daily ads.

Front-end Developer in the team responsible for developing divar.ir, karnameh.com and saku.app websites.

I got many experiences in SEO, fast websites, and large-sized code-bases.

- Developed and open-sourced divar-starter-kit: a React.js boilerplate for SSR, which resulted in reducing the development consumed time and used in many company websites.
- Developed an internal UI library with React.js based on our design system to ship the features faster.
- Developed many JSON-Schema-Form custom behaviors/components to deliver rich dynamic admin panel forms.

Frontend Internship - *Cafe Bazaar*

JUL 2019 - SEP 2019

Cafe Bazaar is a leading application market in Iran with 40 million users.

My project was re-writing application review admin panel from an old Angular application to brand new Vue.js application in a 3-months internship program.

The main challenge was making the application smooth and fast and handling lots of permissions for user's actions and routes.

This project made reviewing processes faster and easier for operators/admins.

Software Engineering Fundamentals Teacher Assistant

Shahid Bahonar University of Kerman

MAR 2019 - MAY 2019

💼 PROFILE

I'm a Front-end engineer based in Iran with over **5 years** in the software industry.

My focus area for the past few years has been front-end development with **React**, **Vue**, **React Native** but I'm also familiar with back-end development, databases, and user interface design.

I have experience of working with startup teams and large scale companies Developed and working on many projects from small to large scale enterprise websites.

🛠️ SKILLS

Skilled in Front-end development:
Javascript, React.js, Vue.js, React Native

Familiar with Back-end development:
Node.js, Express.js, MySql, MongoDB

📚 EDUCATION

Bachelor's Degree in Computer Engineering

Shahid Bahonar University of Kerman

2017 - (Unfinished due to Relocation)

Diploma in Mathematics and Computer Science

National Organization for Development of Exceptional Talents (Sampad)

2010 – 2017

🗣️ LANGUAGES

C++ Programing Teacher Assistant

Shahid Bahonar University of Kerman

OCT 2019 - JAN 2019

React Native Developer - *XAXI*

SEP 2017 - OCT 2018

XAXI is a ride-hailing startup like Uber, servicing 5 cities in Iran.

In XAXI I did:

- Re-written [mobile application](#) with React-Native and makes the app smoother with brand new UI and features
- Released mobile application for both Android and IOS clients.

I got many experiences in working with maps and mobile UI development.

Product Owner - *Boardino*

FEB 2015 - SEP 2017

I developed boardino-app.ir when I was at high-school for my school to make students, teachers, and parents communications easier. I sold it to my school and other schools in town for several years.

In the second re-write, I used Express.js, React.js, React Native, and MongoDB.

I got experiences about back-end, front-end, and mobile development and sales on a small scale, it was a great start.

⚡ PROJECTS

[Saba Contest QR Assistance](#) - *Open source*

Padidar Co. Moblie App - *Mobile Application*

Developing padidar.com mobile application with React- Native.

[Dr. Soal Telegram Bot](#) - *Telegram Bot*

Wireless Controlling Cockroaches with Arduino and neural signal processing - *University Project*

[GetProPic](#) - *Telegram Bot*
